

SUMPS-UP

SUMPs-Up learning activities for Mobility practitioners

Maija Rusanen, Union of the Baltic Cities Sustainable Cities Commission

Monday 11/11/2019 10:00 – 11:30 CET

About CIVITAS SUMP's-Up

Objective

Enable mobility planning authorities across Europe to embrace SUMP as the European-wide strategic planning approach, especially where the take-up is low and the negative effects of transport are severe.

Target

- 7 SUMP's-Up partner cities
- training for 100 cities
- capacity building for 200 mobility practitioners
- reach out to 600 authorities
- 30 SUMP's prepared

Mobility practitioner?

Going through the SUMP cycle – a challenge?

There are as many different ways to set up a SUMP as there are cities..

... however there are also **common elements** that result from implementing the SUMP cycle steps and activities that form **important parts of SUMP**.

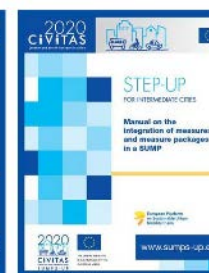

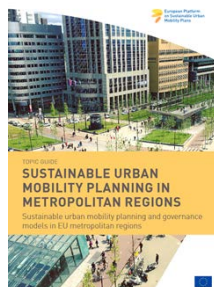

Sounds complicated?

Going through the SUMP cycle – a challenge?

...Luckily there is a lot of support available

Support offered by SUMP-UP

SUMPs-Up offers a variety of opportunities to learn about SUMPs:

- E-courses
- Webinars
- Guidance material, tools , reports

Guidelines for developing and implementing a SUMP (Second Edition)

Publication of the second edition of the European SUMP Guidelines marks an important milestone in the take-up of new planning approaches in Europe. This comprehensive revision aims to integrate the dynamic developments in many areas of urban mobility and the rich experience of implementing the concept of Sustainable Urban Mobility Planning since 2013.

With a fully updated SUMP cycle, more detail on the measure planning, financing and implementation aspects, and over 60 new good practice examples from cities all around Europe, the Guidelines represent the ultimate SUMP resource.

SUMP Topic Guides

A series of guides were published with the second edition of the EU SUMP Guidelines. They provide in-depth planning recommendations on crucial SUMP topics, provide guidance for specific contexts, and focus on important policy fields. The selection below are those authored or co-authored by CIVITAS SUMP-UP. For the whole selection, visit the [full web page](#).

Electrification: Planning for electric road transport in the SUMP context

The guide covers a variety of topics related to the electrification of road transport, including planning for charging infrastructure and the electrification of various fleet types and vehicles.

It also provides guidance on regulatory and policy measures that can be implemented by mobility planning authorities to support a broad electrification of road transport. To contextualise its advice, the guide gives examples of tools and methods, as well as a selection of good practices from leading European cities in e-mobility.

Funding and Finance of Sustainable Urban Mobility Measures

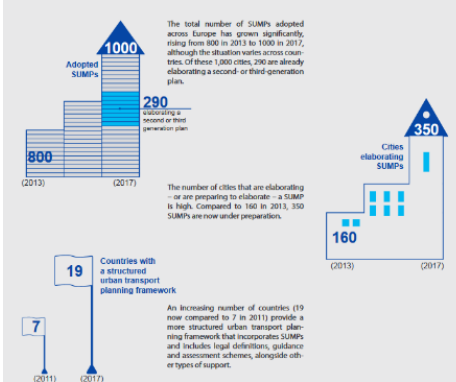

This guide provides urban mobility practitioners with advice on estimating costs and identify financing options for the development of SUMPs, the implementation of measures, and more generally the operation of transport services. This is also contextualised in the context of the eight SUMP principles.

A number of possible sources are explored: local revenue streams, including taxation and value capture instruments; national level funding; European level funding and financing; debt mechanisms and external financing; and through private sector involvement.

Current Status of SUMPs

E-learning courses

SUMPs-UP project offers a series of e-courses for experts working with sustainable urban mobility plans

Why to join?

- Helps to go through the different phases and steps in the SUMP process
- Self-study courses & available any time
- Case examples from cities experienced with SUMPs
- Tips for guidelines and further reading
- Include concrete exercises
- Available at: <https://www.mobility-academy.eu>

New e-learning courses for mobility practitioners - coming soon!

www.mobility-academy.eu

E-learning courses

Course topics:

- **Course 1: Preparing for SUMP and analysis of the mobility situation**
- **Course 2: Co-creating the SUMP vision**
- **Course 3: SUMP as a strategic plan with measurable targets**
- Course 4: Identifying SUMP measures
- Course 5: Prioritising SUMP measures
- Course 6: Action planning
- Course 7: Implementing SUMP

The courses 1-3 are online at
www.mobility-academy.eu

Webinars

- Focus on different aspects of SUMP
- Introduce useful tools and guidelines
- Showcases case examples from cities
- Room for discussion
- 3 more webinars to come

Next Webinars:

**Financing and funding options for
sustainable urban mobility**

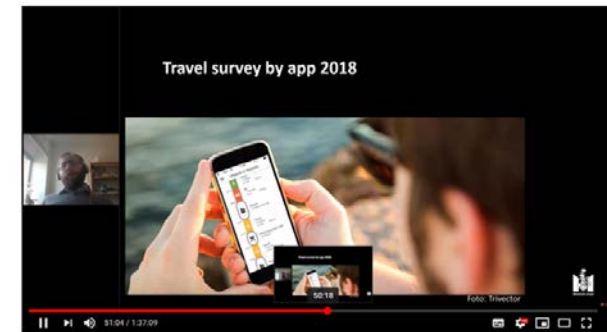

Tuesday 10 December 2019, 10:00-11:30 CET

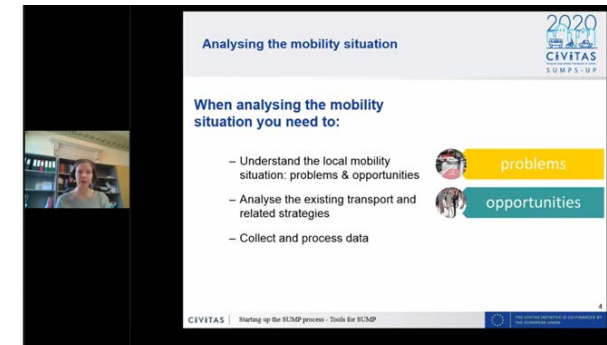

The previous webinars are available at: <http://www.sumps-up.eu/learning-activities/>

Topics:

- 1st Webinar - Starting the SUMP Process - Tools for SUMP (City Case Vilnius, Lithuania)
- 2nd Webinar - Data collection for SUMPs (City Case Malmö, Sweden)
- 3rd Webinar – Measure Selection for SUMP (City Case Oradea Metropolitan Area, Romania)
- 4th Webinar - SUMP action plans and political commitment (City Case Budapest)
- 5th Webinar Introducing the second SUMP Guidelines

SUMPs-Up webinar 2: Data collection for SUMPs
14 näyttökertaa

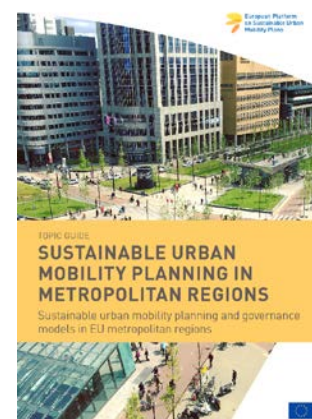

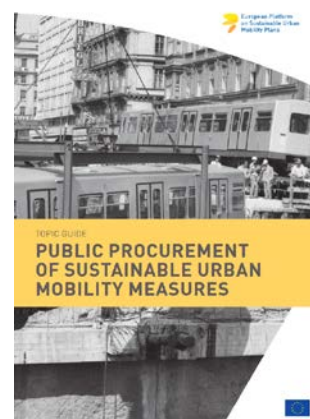

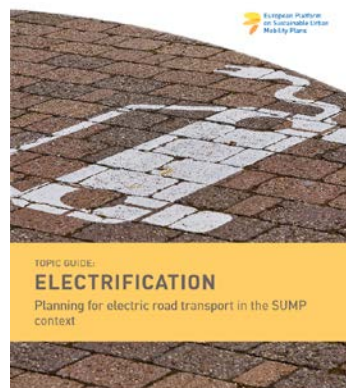

SUMPs-Up webinar 2: Data collection for SUMPs
14 näyttökertaa

GUIDELINES FOR DEVELOPING AND IMPLEMENTING A SUSTAINABLE URBAN MOBILITY PLAN

SECOND EDITION

Start - Beginner Cities

This offers examples and suggestions on conducting measure selection for a first SUMP, possible measures to consider, grading these measures, and gaining approval for their implementation.

Step-up - Intermediate Cities

This gives advice on applying a more systematic approach to measure selection, finding synergies between different measure types and policy areas, and integrating measures from new fields into what has already been done in a city.

Innovate - Advanced Cities

This focuses on finding ways to cooperate with stakeholders and the public and open up participation, approaches that help realise the implementation of new ideas, and devising strategies to foster innovation and reach beyond the transport sector.
